WASH BAY

X-4

A self-contained, environmentally friendly, cleaning system for construction plant and equipment.

X-4

How it works:

It's composed of a wash bay with diamond tread ramps and 2200mm high walls. The wash bay floor pan directs the dirty water and sludge from the equipment being cleaned to a Solids Collection tank at the rear of the wash bay. Inside the rear tank a float switch activates a diaphragm pump that delivers the dirty water into the Filtration Tank to commence the filter process. After the water has been through the filter process a booster pump delivers the water again to your pressure washer. Through the filtering system it allows you to use the same water repeatedly. The filters inside the separator tank can be easily replaced guaranteeing an adequate filtering barrier.

Advantages

- The system allows you to recycle water and therefore the contaminated water does not get into the drainage system.
- Less water consumption means money is saved and savings are also gained in handling and washing time.
- Easily transportable, easy to assemble and disassemble
- Innovative design and modular construction system make our wash bays suitable for several indoor and outdoor uses.
- Environmentally friendly

SUITABLE FOR THESE SECTORS

rental companies

mechanical workshops

contractors

industrial applications

Technical Specifications - X-Splash - X-4

Useful dimension mm.	3000x6000
Total dimension mm.	3590 x 7250
Filtration tank dimension mm.	(X-10) 2810 x 740 x 990h
Maximum load capacity kg	5.000
Walls standard height mm.	2200
Total dry weight of the bay kg	2240
Diaphragm pump	0,054 kW - 17lt/min
Booster pump	0,37 kW - 5 to 40 lt/min.
Filtering system	X-10
Option filtering system	X-15, X-30, X-60
Option maximum load capacity kg	10.000/20.000
